Oct 2, 2026: night event, 11:12–11:23 PM

Grady-White (blue hull) on DOCK 1 · DW Spectrum, LACGAR-DW-SVR · Reviewed Nov 8, 2026
All times EDT (the timeline clock). Nobody is identified by face; only what is visible is described. The owners were away (they left that morning for a wedding). On Nov 7 the owner said the group is not known to anyone and was not authorized.

1. Summary

- **A silver, boxy SUV** with a black roof came up the front drive at 11:12 PM and left at 11:23 PM. The plate is **not readable** in any frame.
- **Five people:** three walked onto the dock (A, B, C below) and two waited outside the dock gate (D, E).
- The three on the dock spent about **2½ minutes** there (about 11:15:55 to 11:18:05). They looked at the Grady-White and the lifts, and two of them held phones up as if taking photos or video.
- **Nobody climbed aboard** the Grady-White. The boat stayed raised and covered. One man put a hand on the arm of the empty lift seen on DOCK 2; that lift did not move.
- Hands look empty on the way out. No long, speargun-sized item is seen.
- **DOCK 3 has clear colour views of all three faces** at 11:16:14 and 11:17:50 (section 4).

2. Timeline (every recorded frame watched, Nov 8)

The night event is first; the earlier daytime events on Oct 2 follow it, after the other-camera checks.

Time	Camera	What is seen
11:12:20	FRONT DRIVE, FRONT ENTRY	The SUV turns into the front drive; FRONT ENTRY shows the headlight sweep.
11:12:55	FRONT DRIVE	Clear side view of the SUV (frame 1).
11:13:40–11:14:15	FRONT DRIVE	It loops round and stops at the top of the drive facing out, brake lights on.
11:13:42–11:13:51	S.W. DRIVEWAY	A short clip, triggered by light. Nobody in view.
11:14–11:22:55	FRONT DRIVE	No recording (this camera records on motion only). What the SUV did here is not on video.
~11:14:50	DOCK PTZ	D, in a white top, appears at the right (street and drive side).
11:15:20–11:15:36	DOCK PTZ	The group comes along the seawall walkway and through the dock gate. D waits outside the gate.
11:15:55–11:16:00	DOCK 3	A, B and C walk down the dock toward the camera. B leads.
~11:16:10	DOCK PTZ	E, in dark clothing, is outside the gate with D.
11:16:05–11:16:37	DOCK 3	A stands right under the camera facing it, looks at a phone, then holds it up toward the dock (frames 4 and 7). Glasses are on and off.
11:16:47–11:17:05	DOCK 3	C stands mid-dock holding a phone up in front of her, pointed along the dock, as if taking a photo or video.

11:17:08–11:17:20	DOCK 1	A walks along the dock at the Grady-White's stern and looks up at the boat and lift. The boat stays raised and covered.
11:17:20–11:17:56	DOCK 3	All three stand together talking. B points at the lifts. At 11:17:50 all three face the camera (frame 6).
11:17:28–11:17:52	DOCK 2	B puts a hand on the arm of the empty lift (frame 11). The lift does not move.
11:17:30	DOCK PTZ	D, outside the gate, is on a phone.
11:17:58–11:18:05	DOCK 3	All three walk back toward the gate, hands apparently empty.
11:18:40–11:19:40	DOCK PTZ	They go out through the gate and leave to the right. One uses a light, apparently a phone flashlight.
11:19:20–11:21:13	DOCK PTZ	One person in a dark top and pink or red shorts (clothing matches B) stays just outside the gate, on a phone, at times facing the camera (frame 13).
11:21:13–11:22:37	DOCK PTZ	No recording. When this person left is not on video.
~11:22:45	DOCK PTZ	Headlights sweep the scene.
11:22:55	FRONT DRIVE	Recording resumes. The SUV is at the top of the drive, brake lights on.
~11:23:05	FRONT DRIVE	The brake lights go off and it pulls out (frame 14). The plate area is a white glare.
11:23:10–11:23:13	FRONT DRIVE	It passes the gate and turns onto the street toward the left of the frame (frames 15–16). After that it is not on any camera.

From the group's walk back (11:19:40) to the SUV leaving (11:23:05) is about 3½ minutes. Of that, the only recorded activity is the person by the gate on a phone until 11:21:13. The rest falls in recording gaps on both DOCK PTZ and FRONT DRIVE. The other cameras were checked for those minutes too (next section): none of them recorded the group walking back or getting into the SUV.

Other cameras during the gap (checked Nov 8)

- **FRONT ENTRY:** records only from about 11:12 to 11:14 PM (an empty porch and a light change as the SUV's headlights pass). It records nothing more until after midnight.
- **N.W. DRIVEWAY:** has short clips at about 11:08:50, 11:13:40 and 11:19:35–11:19:50, then nothing until about 11:33. The 11:19 clip is inside the gap; it was played in real time and shows only the empty paved driveway and the side gate, with a small change in lighting. No people or vehicles appear in it.
- **S.W. DRIVEWAY:** one empty clip at 11:13:42–11:13:51 (already noted above).
- **DW Spectrum event log:** opened read-only (no settings changed). It holds no entries for Oct 2 or Oct 3; its earliest entry is Oct 11 (camera network errors). So it neither shows nor rules out a camera or recording problem that night; it may simply not keep entries that far back.

Was the dock gate shut when they left? (checked Nov 8)

Checked frame by frame in the native DOCK PTZ export, using the black iron dock gate with the small white sign on it.

- **Going in (~11:15:20–11:15:36):** the gate swings open and the group walks through. The video does not show whether they used a code, a key or just the handle.
- **Going out (~11:18:40–11:19:40):** the gate swings again as they pass back through.

- **After they left:** the gate is back in **exactly the same position as before they arrived** (the sign and bars line up), and it stays there to the end of the export (about 11:25 PM). The person who waited outside the gate on a phone until 11:21 is not seen opening it again.
- **Locked or latched: cannot be confirmed.** The lock or latch is too small and too far away to see, and this export has no sound to hear a click. So the gate **looks closed**, but the video cannot show whether it latched or locked.
- Easy check for the owner: whether the gate locks by itself when it shuts (self-closing or self-latching), or needs a key or code. If it locks by itself, being closed means it was locked.

Frame 24 · DOCK PTZ, the dock gate. Left: before the group arrived. Middle: the group going out through it (~11:19 PM). Right: the end of the export (~11:25 PM). Left and right match: the gate is back in its closed position.

Earlier the same day (Oct 2, before the night event)

The owners left the morning of Oct 2 for a weekend wedding. Their exact departure time has not been found on video yet.

Time	Camera	What is seen
11:30–11:46 AM	Dock cameras	Nobody on the dock.
11:46–11:47 AM	DOCK 3, DOCK PTZ	A person in a blue shirt and dark shorts walks down DOCK 3 from the far (water) end toward the Grady-White. A second person is near the far lifts (DOCK PTZ). UNSURE
11:47–11:48:30	DOCK 1	The Grady-White is lowered on its lift. At about 11:48:10–11:48:30 the person in blue is in the cockpit, then at the stern by the motors.
11:49:40–11:51	DOCK 1, DOCK 3	The boat goes back up and is fully raised by 11:50:20. The person is back on the walkway and walks off toward the far end at about 11:51. They were aboard about 2 minutes. Nothing is seen being carried, but the view of the hands is poor.
11:51 AM–12:08 PM	DOCK PTZ	One or two people stay by the far lifts until about 12:08 PM, then are out of view. Nobody passes the dock gate in this window, so they came and went by the far end of the dock (by water or from next door), not from the street.
9 PM–midnight	DOCK 1 (cockpit motion search)	Three short motion hits, including about 9:01 and 9:34 PM. Nobody aboard; the boat stays raised. The 11:15 PM group did not trigger the cockpit box, which fits them not boarding.

- The midday visit happened on the day the owners left. It could be a boat or lift service check. **Ask the owner** whether anyone was booked to check the boat or lift around noon on Oct 2.
- **Not yet reviewed:** Oct 2 from midnight to about 11:30 AM and from about 12:10 to 9 PM on the dock cameras, and the whole day on FRONT DRIVE, FRONT ENTRY and the driveway cameras. This would include

the owners leaving and any vehicle that came up the drive earlier, such as the same SUV.

Oct 2, 11:47:09 AM · Four cameras (top: DOCK 1, DOCK 2; bottom: DOCK PTZ, DOCK 3). Person in blue walking down DOCK 3.

Oct 2, ~11:48:10 AM · Four cameras. The boat lowered; person in the cockpit (DOCK 1).

Oct 2, ~11:50:40 AM · Four cameras. The boat raised again; person back on the walkway (DOCK 3).

3. The vehicle and the plate

- Silver or light grey, boxy four-door SUV. Black roof, roof rails, a full-width rear light bar and dark wheels.
- The shape resembles a 2024 or later Toyota Land Cruiser or Lexus GX. This is **not confirmed**.
- **Plate:** at about 11:23:05 the brake lights go off as it pulls away. The plate area is lit, but in every frame it is a white, overexposed rectangle. No characters can be read, and enhancement does not recover any. The original camera export might hold a little more (section 5).

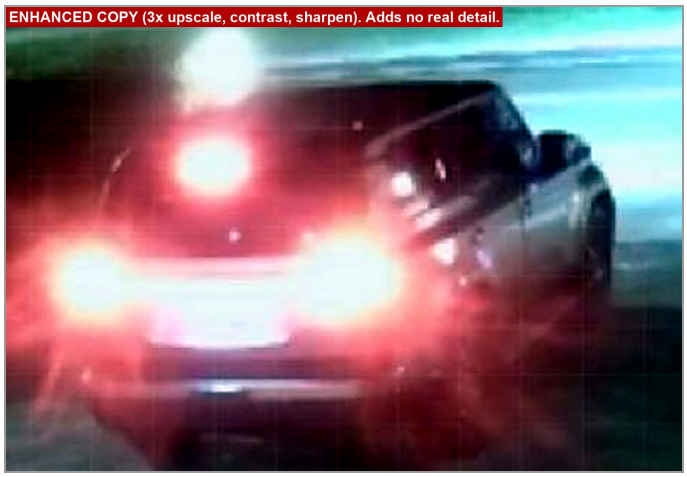

Frame 1 · 11:12:55 PM · FRONT DRIVE. Side view of the SUV.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

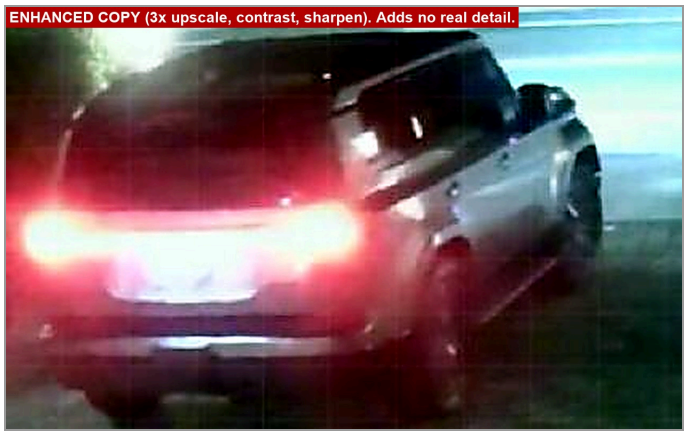

Frame 2 · ~11:14 PM · FRONT DRIVE. Rear view, brake lights on, at the top of the drive.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

Frame 14 · ~11:23:05 PM · FRONT DRIVE. Brake lights off, pulling out. The plate is a white glare.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

Frame 15 · 11:23:10 PM · FRONT DRIVE. At the gate.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

Frame 16 · 11:23:11 PM · FRONT DRIVE. Turning onto the street, toward the left of the frame.

4. The people: clearest frames

> The first set of face crops comes from the native 4K export; the later set was captured with DW Spectrum's on-screen zoom at screen resolution. Each enhanced copy is labelled; enhancement only makes what is there easier to see and **does not add detail**. Nobody is identified here; these are for the owner and the police.

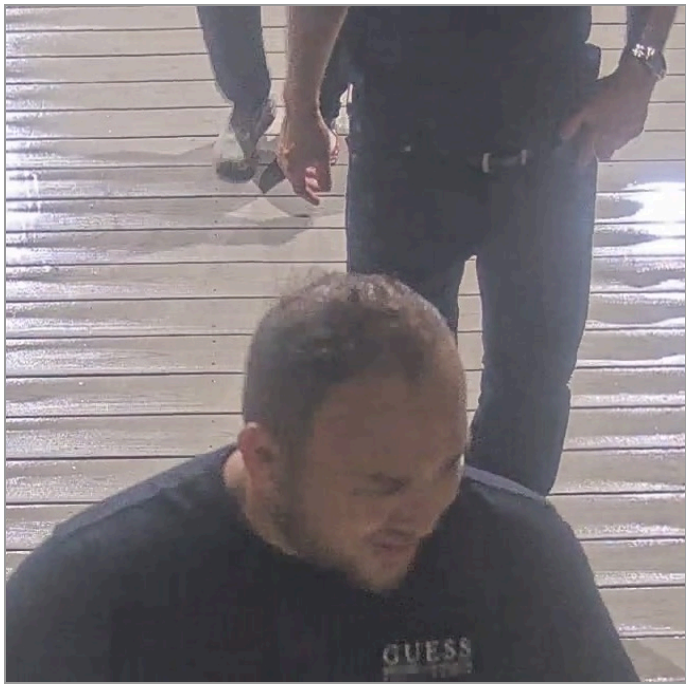

Person	What is visible	Best frames
A	Man, short grey hair, glasses (on and off). Navy t-shirt with a small red and white logo on the left chest, dark jeans, dark sneakers, a watch or bracelet on the left wrist. Uses a phone throughout.	DOCK 3, 11:16:14 (face, close) and 11:17:50
B	Man, short dark hair, stubble. Navy or black t-shirt with white print on the chest reading “GUESS” over a smaller line (clear in the 4K export; earlier screen captures read it as “G&SS”), pink shorts, light-coloured boat shoes.	DOCK 3 4K export, ~11:15:59 and ~11:17:48 (frames 17–18)
C	Woman, dark hair tied back. Black short-sleeve top, dark jeans or trousers with a belt with a round silver buckle, white sneakers. Possible tattoo or mark on the left forearm. Holds a phone up at about 11:16:50–11:17:05.	DOCK 3, 11:17:50 (face toward camera, a little soft)
D	White t-shirt, dark jeans, light shoes. Waits outside the gate; on a phone about 11:17:30.	DOCK PTZ ~11:16 (distant, no usable face)
E	Dark clothing. Outside the gate from about 11:16:10.	DOCK PTZ (distant, no usable face)

Sharpest faces: from the native 4K DOCK 3 export (added Nov 8)

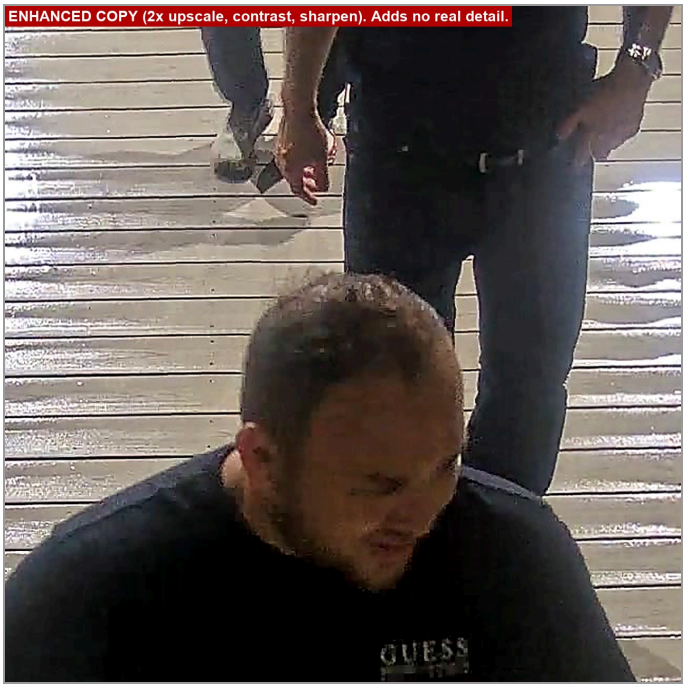

These crops come straight from the exported DOCK 3 video file (3840×2160), not from the screen, so they are much sharper than the screen captures further down. Times are worked out from the file and are accurate to about ±2 seconds.

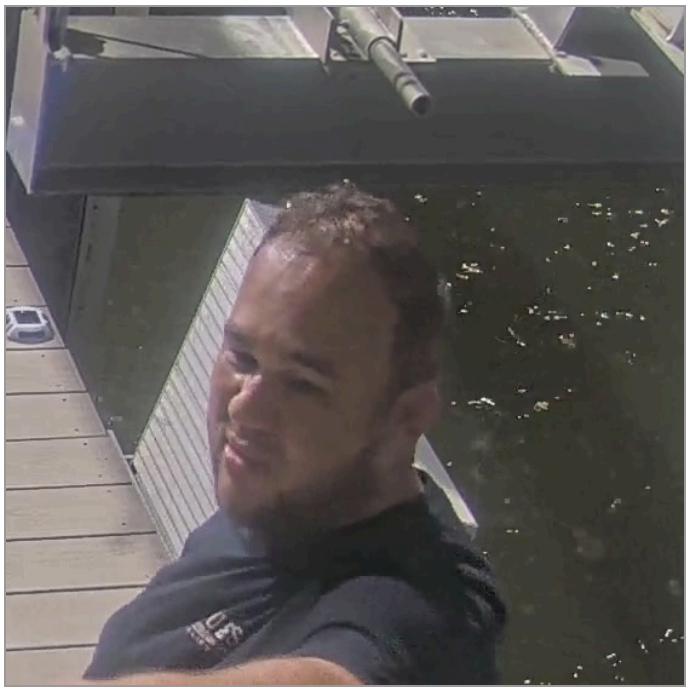

Frame 23 · ~11:17:48 PM · DOCK 3 4K export, full frame (reduced). A (left), C (centre), B (right, pointing at the lift).

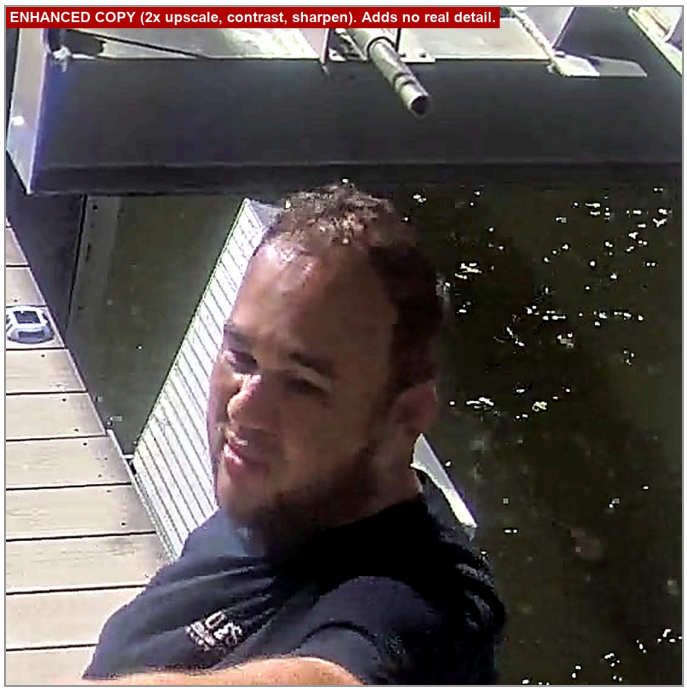

Frame 17 · ~11:15:59 PM · Person B walking toward the camera. Shirt reads “GUESS”.

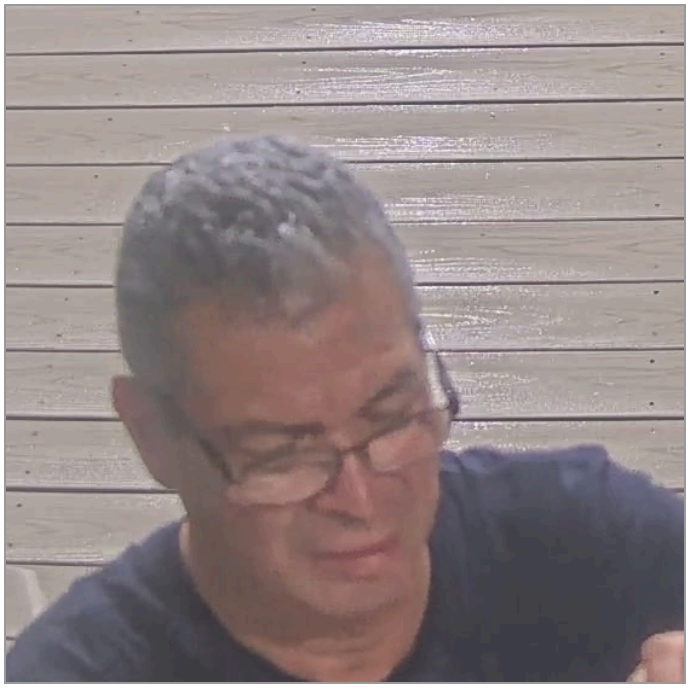

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

Frame 18 · ~11:17:48 PM · Person B facing the camera, pointing at the lift.

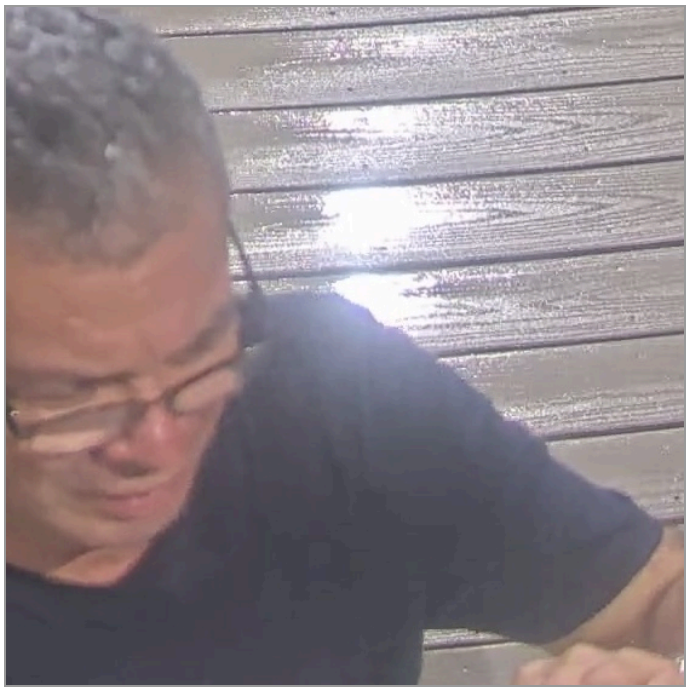

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

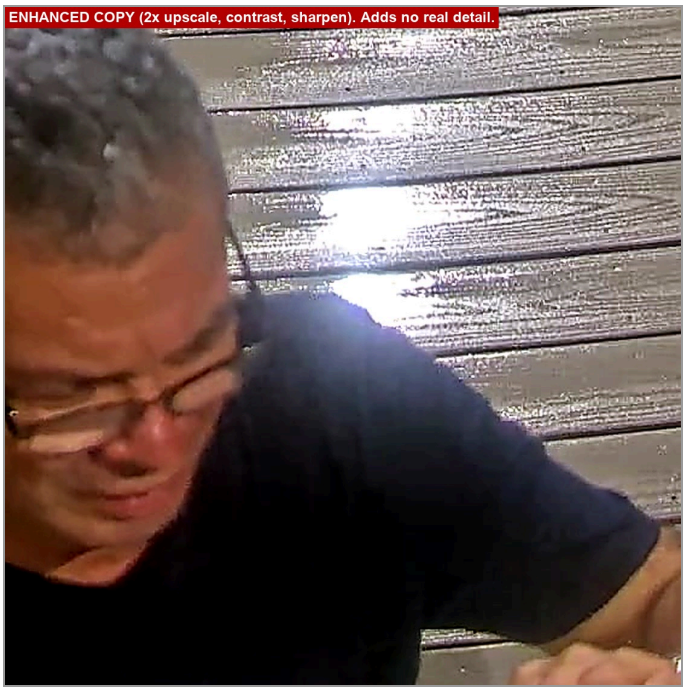

Frame 19 · ~11:16:33 PM · Person A, glasses on, holding a phone.

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

Frame 20 · ~11:16:37 PM · Person A at his closest to the camera.

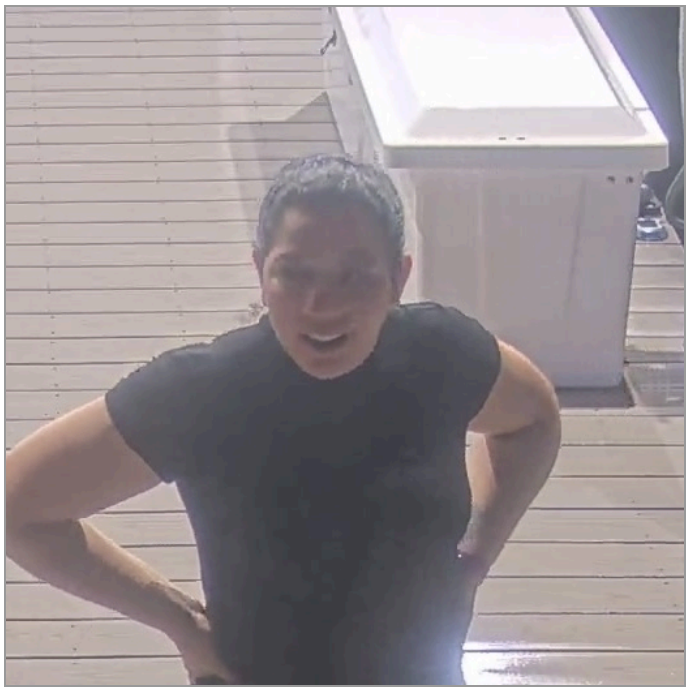

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

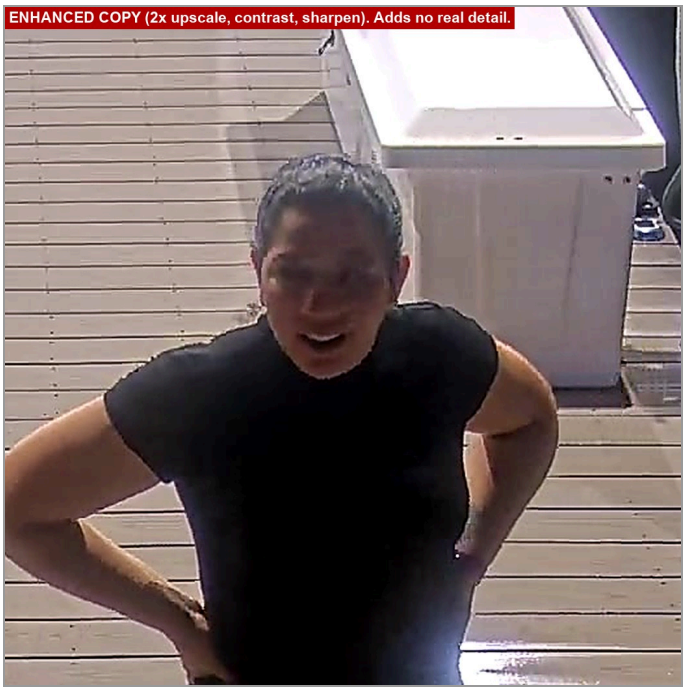

Frame 21 · ~11:16:08 PM · Person C, hair tied up, looking down at a pink phone.

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

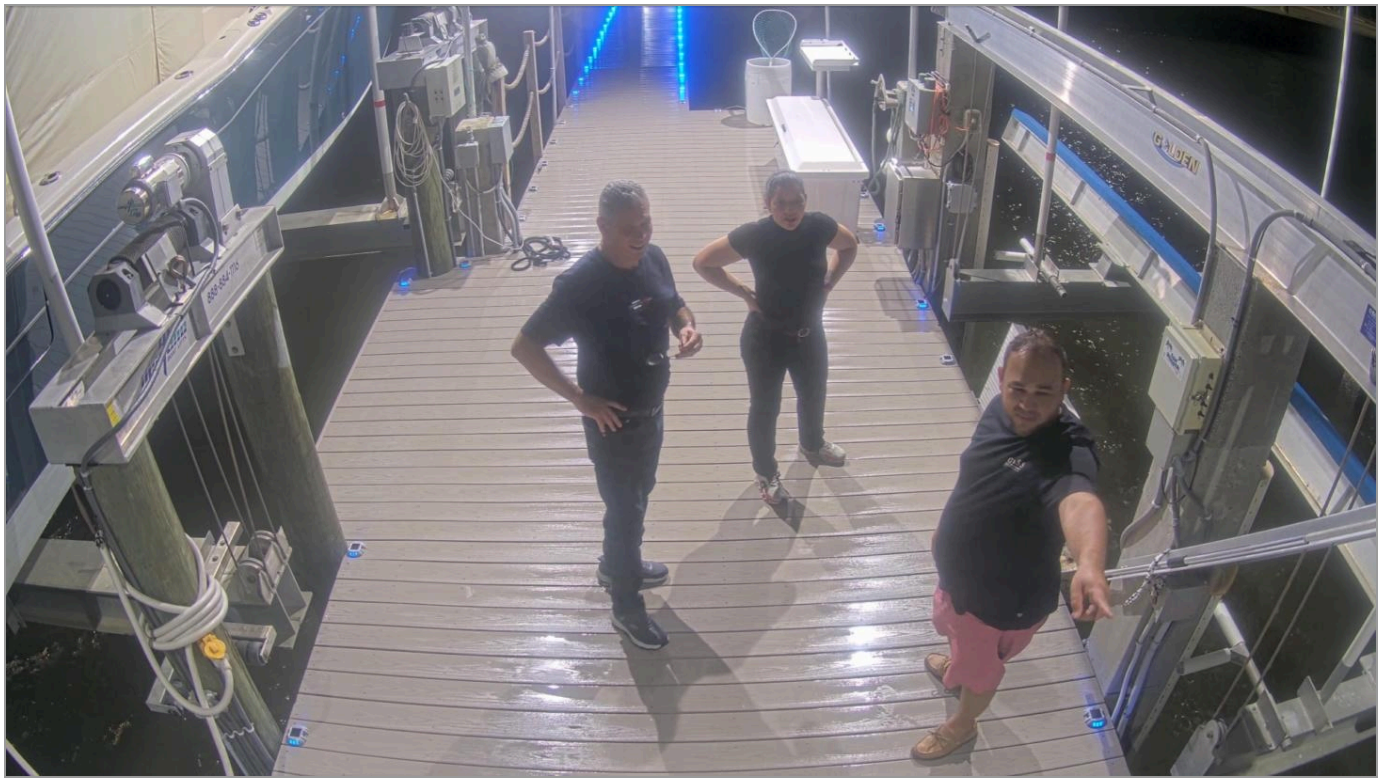

Frame 22 · ~11:17:48 PM · Person C facing the camera, hands on hips.

Enhanced copy of the same crop (upscaled, contrast, sharpened). It adds no real detail.

Earlier screen captures

Frame 6 · 11:17:50 PM · DOCK 3, full screen. A (left), C (centre), B (right, pointing at the lift).

Frame 4 · 11:16:14 PM · DOCK 3, zoomed. Person A, closest to the camera.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

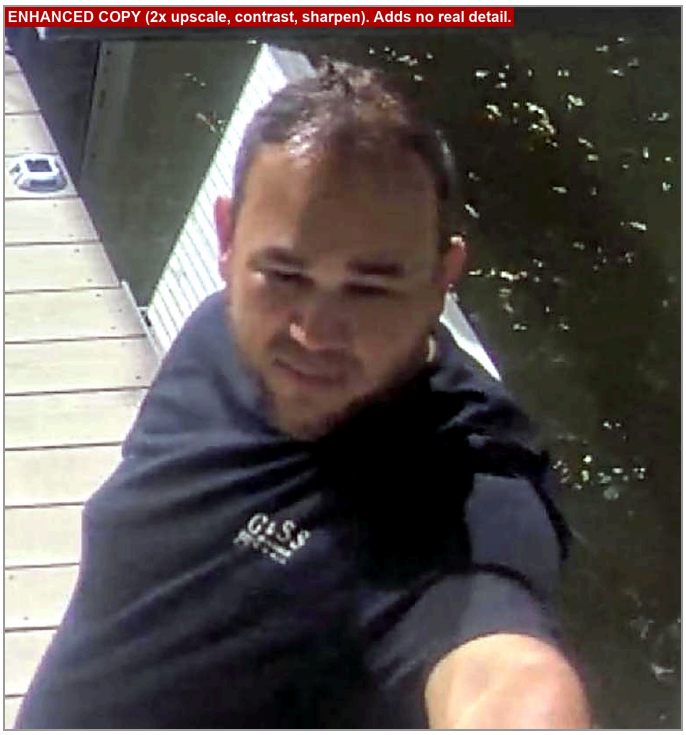

Frame 7 · 11:17:50 PM · DOCK 3, zoomed. Person A.

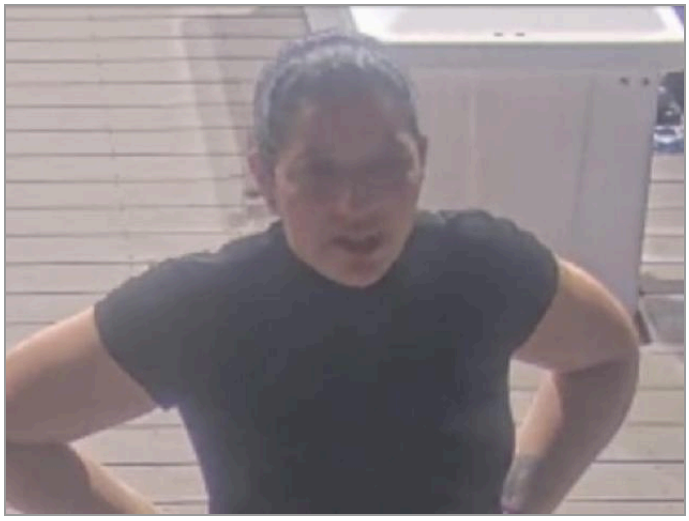

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

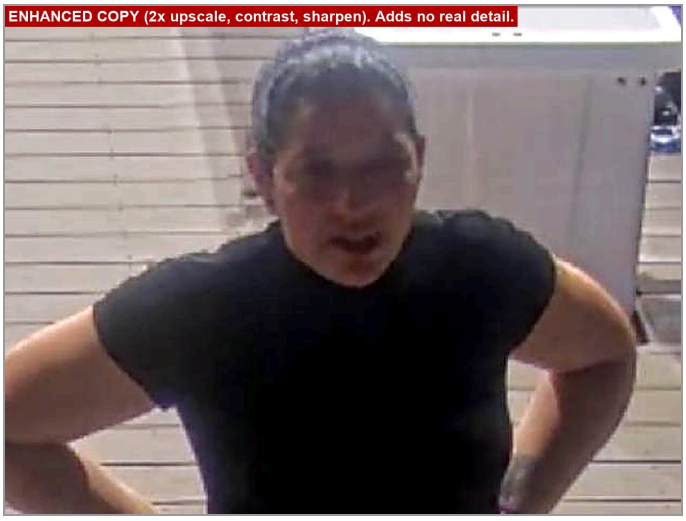

Frame 8 · 11:17:50 PM · DOCK 3, zoomed. Person B; chest print visible.

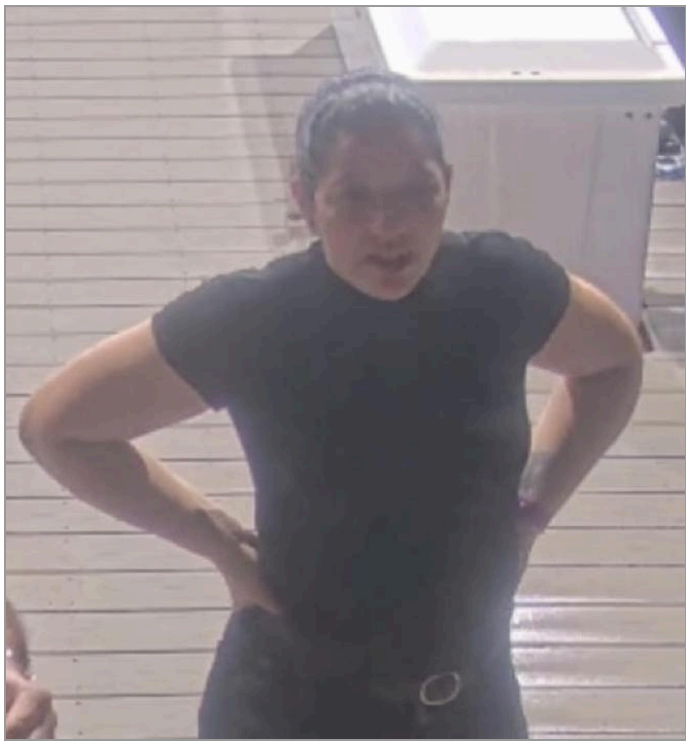

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

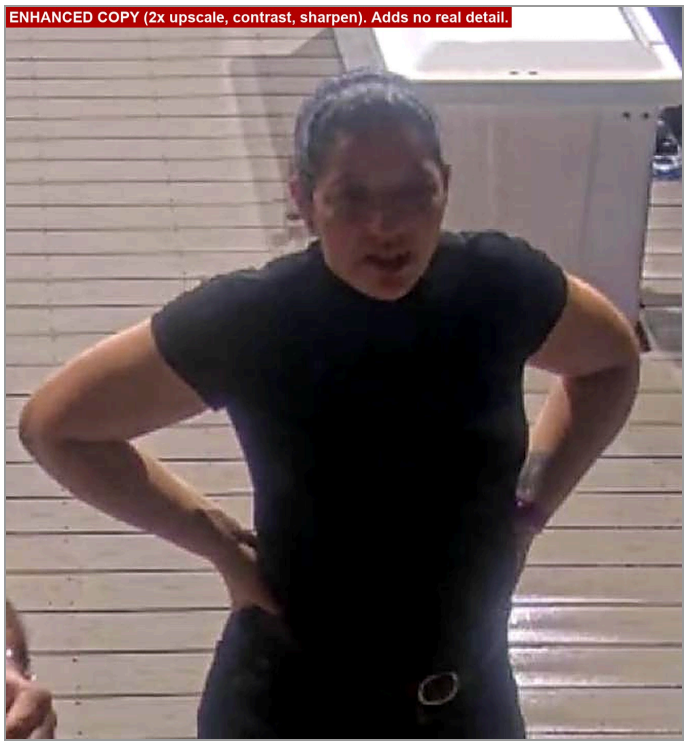

Frame 9 · 11:17:50 PM · DOCK 3, zoomed. Person C.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

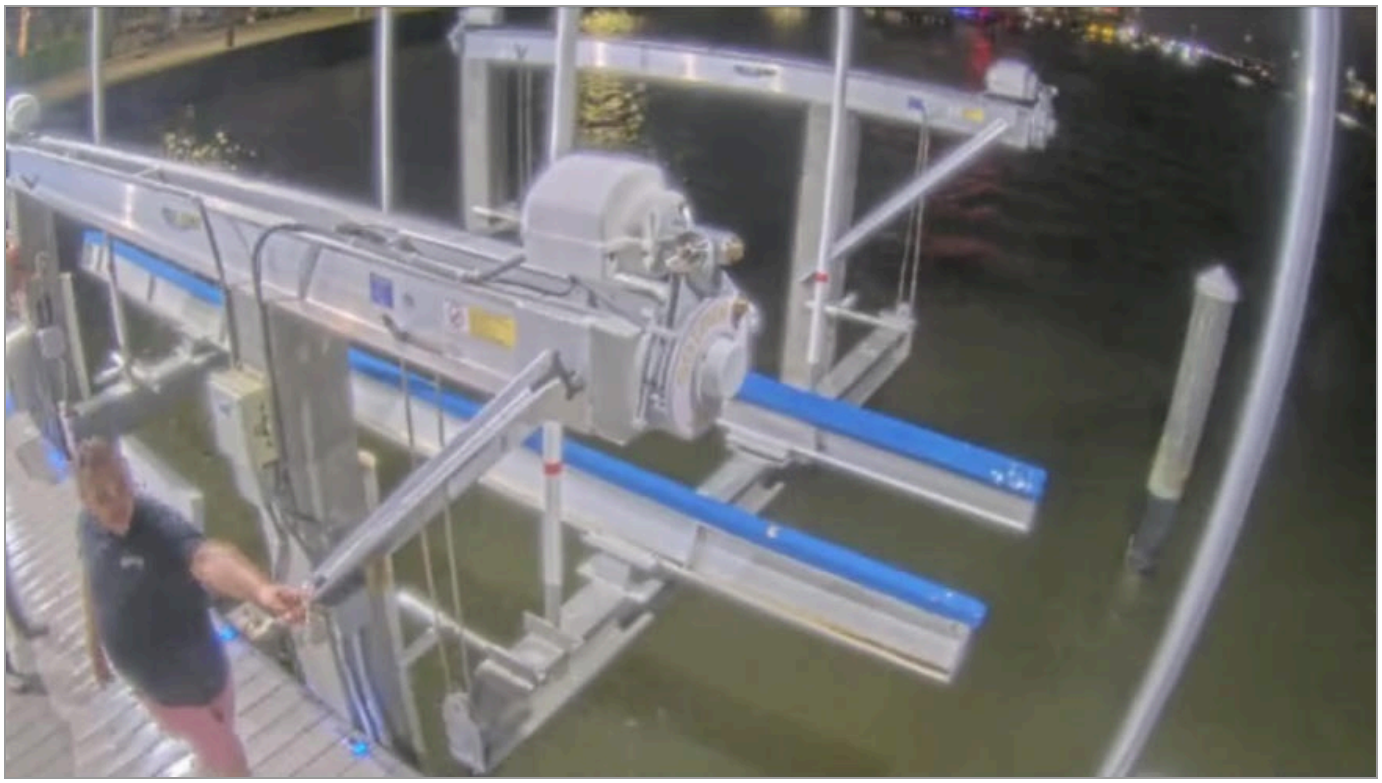

Frame 10 · 11:17:50 PM · DOCK 3, zoomed. Person C, upper body and belt.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

Frame 5 · 11:17:43 PM · DOCK 3. A, C and B (back to camera).

Frame 11 · 11:17:49 PM · DOCK 2. B with a hand on the arm of the empty lift. It does not move.

Frame 12 · 11:18:39 PM · DOCK 1. The Grady-White raised and covered; a person at the right edge on the dock.

Frame 3 · ~11:16 PM · DOCK PTZ. D, in white, outside the dock gate.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

Frame 13 · ~11:20 PM · DOCK PTZ. One person (clothing matches B) waits by the gate on a phone.

Enhanced copy of the same frame (upscaled, contrast, sharpened). It adds no real detail.

5. Limits, audio and the original video

- **Recording gaps:** FRONT DRIVE 11:14–11:22:55 and DOCK PTZ 11:21:13–11:22:37. Nothing can be said about those minutes. No other camera filled them in (section 2). The likely reason is that these cameras record only when their motion detection triggers, and at night, at a distance or outside the camera's view, people and a slow vehicle may not trigger it. This could not be confirmed without opening the recording settings, which this review does not do; the system owner can check the motion sensitivity and schedule for FRONT DRIVE and DOCK PTZ.
- **Audio:** DOCK 2 and DOCK 3 show a microphone (talk-back) button in DW Spectrum, so those cameras have audio hardware. Whether sound was recorded could not be checked: this review only looks at the picture, and no settings were opened. Playing the clip with speakers on, or asking the system owner, would settle it.
- **Resolution:** frames 1–16 are screen captures; frames 17–23 come from the native 4K DOCK 3 export. A native DW export of 11:12–11:24 PM from DOCK 3, DOCK PTZ and FRONT DRIVE would keep the camera's full resolution and timestamps, and is what the police will want. **Done Nov 8:** native .mp4 exports of 11:10–11:25 PM from all eight cameras named here (DOCK 1, DOCK 2, DOCK 3, DOCK PTZ, FRONT DRIVE, FRONT ENTRY, N.W. DRIVEWAY, S.W. DRIVEWAY) are kept offline and available on request. File list in section 8 of the main report.
- Earlier versions of the main report said the SUV was seen waiting at 11:18 and 11:22. Those were held frames, now corrected.
